

FIREWIRE® 1394-B 6-Port HUB/Repeater

The FIREVue™ FireWire 1394-B Repeater / Hubs make it easy to connect or disconnect devices without disturbing others. Rather than the daisy-chain type of connections where devices are plugged into each other, the FIREVue Hubs allow devices to be plugged in without effecting the chain. Signals are also regenerated and cleaned which makes possible longer cable length.

extend your cable length and connect or disconnect devices without disturbing others.

The supplemental power supply adds needed power when devices do not supply it.

FireVue 1394-B FireWire Repeater/HUB
 3 Port IEEE 1394 FireWire 400 or 800
 Supplemental Power Supply
 One Year Warranty

FIREVue™ 1394-B FireWire 800 Repeater/HUB with aux. Power Supply

FEATURES AND BENEFITS :

- DATA TRANSFER RATE :

100/200/400/800 Mbit/sec.

- DEVICE SUPPORT :

DV camcorders (Canon, JVC, Panasonic, Sony, Sharp and more,) hard disk drives, printers, MO drives, CD Roms, scanners, digital cameras, and audio/video devices including TV, VCR, DVD to your computer.

- COMPATIBILITY : IEEE 1394-

1995 and 1394A and 1394B

- Connectors : 3 IEEE 1394

FW 800 - 9 Pin Powered Type

- Support : Plug-n-Play and

Hot-Swapable operation

- OS Compatibility : Works

with all OS that support IEEE-

1394A/B or that have a

compliant card and software

- Cable Limitation :

4.5 meters with standard

cables, 10 meters with

Granite Digital cables

The FIREVue™ IEEE 1394-B FireWire Repeater / HUB creates the ability to easily add or remove devices without interrupting other devices on the bus. This 6 port model can also be tied together to support as many ports as needed. The HUBs also act as a repeater, regenerating the signals and producing additional cable length. Now you can go long distances without any signal loss.

When used in conjunction with our FIREVue Cables the distance between devices can be up to 30 feet. Designed with state-of-the-art components we are capable of supporting up to 800 Mbits/second data transfer rates. Our design also supports Plug-n-Play and Hot-Swapability giving the ability to remove or add devices while the system is up and running. Both FireWire® and iLink® devices can be used. It has never been easier to add devices to your computer.

Compatibility is always a concern so we have made our FIREVue Repeater / HUBs compliant with both the IEEE 1394-1195, 1394A, and 1394B standards. We are also compatible with all operation systems and also support multiple initiators on one bus. Regulatory approvals include FCC Class B and CE.

Part #	Description
2381	6 Port 1394-B FireWire 800 Repeater / HUB - 9 Pin

The finest FIREWIRE Repeaters
engineered to be superior.
