

# FIREWIRE® 1394-B / PCI Host Adapter

The FIREVue™ FireWire 400 and 800 1394-B PCI Host Adapters are the fastest FireWire hosts on the market. These boards are truly "third generation" and transfer up to 80 MB/s! The affordable FireWire 400 model offers compatibility with all devices on the market while the New FireWire 800 also includes support for the faster 1394-B specification.

speeds up to 80MB/s can be achieved with the 1394-B specification.

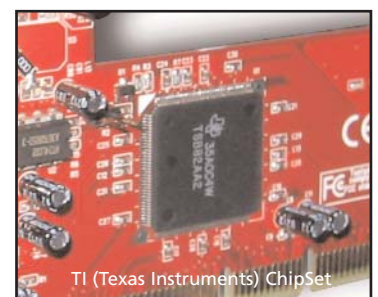

Both cards are completely compatible with Mac, Windows, and Linux operating systems. Simply plug and play in most cases because FireWire support is now built into all of these operating systems.

- FireVue 1394-B FireWire 400 or 800
- 80 MB/s Third Generation Speed
- 3 Port Built In HUB
- Supports ALL Std. FireWire Devices
- One Year Warranty

# FIREVue™ 1394-B FireWire 400 or 800 PCI Host Adapters

## SPECIFICATIONS :

### - DIMENSIONS :

1394-A Model

5" (L) x 3.75" (H)

1394-B Model

6.25" (L) x 2.5" (H)

### - DATA TRANSFER RATE :

1394-A Model

100, 200, 400 Mbit/second

1394-B Model

100, 200, 400, 800 Mbit/second

### - DEVICE SUPPORT :

Hard disk drives, MO drives, CD

Roms, CD-RW, CD-R, DVD,

Tape, Cameras, other devices

### - COMPATIBILITY :

IEEE 1394-1995, 1394-A

and 1394-B

### - CONNECTORS :

1394-A Model

3 - 6 Pin 1394-A Powered Type

1394-B Model

1 - 6 Pin 1394-A Powered Type

2 - 9 Pin 1394-B Powered Type

### - OS COMPATIBILITY :

Works with all OS's that

support IEEE-1394-B along

with Plug and Play for most

operating systems.

Our **FireWire 800** PCI Host Adapter will run FireWire at speeds up to 80MB/s while continuing to have backwards compatibility with FireWire 400 devices. Our unique design incorporates three connectors, (2) 9 Pin FW800 connectors and (1) 6 Pin FW400 connector. These boards support Plug and Play on most operating systems and use the best TI chipset on the market for added compatibility. Full 64bit/33MHz PCI buses are supported while maintaining 32bit compatibility.

Our **FireWire 400** PCI Host Adapter will run FireWire at speeds up to 40MB/s. Our unique design incorporates three 6 Pin FW400 connectors. These boards support Plug and Play on most operating systems and use the best TI chipset on the market for added compatibility. Full 34bit/33MHz PCI buses are supported. Auxiliary power can be plugged into the card to support up to 1.5 amps of power per port.

## FireWire 800 PCI Host Adapter

**NEW 1394B  
800 Mbit**

(2) 9 - Pin 1394B Connectors for FireWire 800 Hard Drives and devices.

6 - Pin 1394A Connector for Cameras and CD, DVD, Hard Drives, etc.

Compatible TI (Texas Instruments) chipset guarantees speed and easy connectivity.

Aux. Power Connector can supply up to 1.5 amps per port.

Runs on both 64 bit and 32 bit slots. 33 MHz PCI operation.

## FireWire 400 PCI Host Adapter

(3) 6 Pin FireWire Connectors

Compatible TI (Texas Instruments) chipset guarantees speed and easy connectivity.

Aux. Power Connector can supply up to 1.5 amps per port.

Runs on any 32 bit PCI slot. 33 MHz PCI operation.

Includes 3' 6 Pin to 4 Pin Cable

Part #	Description
4546	1394 Firewire to PCI Host (400Mbit)
4547	1394-B Firewire to PCI Host (800Mbit)
