

CUSTOM RAID / ARRAY CASES.

The SCSI UUE Ultra SCSI Cases are the best external Array or Raid Enclosures available on the market. These Enclosures allow you to chain up to 15 Ultra SCSI devices on one channel! Cases costing up to three times more expensive can not offer the same level of performance.

The secret to our design is simplicity.

The secret to our design is simplicity. We do not use complicated back plane designs or hot swap bays that add extra connectors and change the impedance of the bus. Rather, we simply use the best components such as Teflon® or TPO Cabling, High-Precision Active Diagnostic Termination, Redundant Power Supplies, and Redundant Cooling Fans. Simply stated, our stuff works!
